

The BSAP Fund – resources and use

Fifth HELCOM BSAP Stakeholder Conference 03.03.2010

Harro Pitkänen

- Implementation of the BSAP will require massive, diversified action:
 - from country to country
 - from sector to sector
 - soft measures (public awareness, regulatory action, training, technical assistance) & hard measures (investments)

- Financing, as such, is not the bottleneck, but to have financeable projects !

- Technical assistance is needed !

- NIB & NEFCO took the initiative to set up a targeted TA fund
- Sweden and Finland have, so far, provided contributions. Others are invited !
- The BSAP Fund has EUR 10, 6 million available.
- NIB and NEFCO are jointly acting as fund managers.

- The financing is provided as grants.
- Local participation is important (e.g. through recipient counterpart funds)
- In addition to NIB and NEFCO, applications can also be made through other international and national finance institutions, which are active in relation to the BSAP.
- NIB and NEFCO or other finance institutions will be responsible for preparing the terms of reference and procurement.

Eligible purposes:

- **Institutional Support**
 - Training and support related to project development, preparation and implementation.
- **Demonstration purposes**
 - Purchase of equipment for demonstration purposes.
- **Project Development and Preparation**
 - In particular with a view to making projects "bankable".
- **Project Implementation**
 - Support to project owners for improved efficiency and quality in the project implementation, and for disseminating experience.

■ Eligible Recipients

Public or private entities in need of TA and investment grants with regard to institutional support and project development for implementation of the BSAP.

■ NIP context

NIPs are an important frame of reference

■ Follow-up financing

IFI financing

- NIB's EUR 500 million BASE facility
- NEFCO's risk capital and other programs
- EIB financing

Other banks, private initiatives

Public financing parties including EU structural funds

- **Project pipeline under preparation**
 - Business plan development for poultry farms
 - Preparation of manual for biogas projects
 - Test project for phosphorus removal
 - Improvement of small and medium-sized WWTPs
 - Demonstration projects in managing agricultural run-off

- **Applications are welcome !**
