

LOCATION OF OIL SPILLAGES OBSERVED BY AERIAL SURVEILLANCE WITHIN THE BALTIC SEA AREA, 1999, INCLUDING THE MARITIME BOUNDARIES

MT Apr 27 13:28:10 2000

Note: The discrepancy between the figures for "Total number of observations" (cf. the 1999 Map; 435) and for "Confirmed pollutions" (cf. the Statistics; 487) is due to the fact that some observations are not included in the 1999 Map because of lack of estimation of the quantity of discharged oil or lack of indication of the location of the observed oil spillage.
