

5. Area Tables and Maps

Protection categories and criteria used in the Area Tables:

A. Strict protection

By strict protection in this context is meant that nature protection is the dominant interest in the area, and that nature conservation is the dominant form of land use. Such strict protection could, however, also include a certain degree of human influence in the form of, e.g., organized grazing or hay-making (mowing). Such activities are then carried out exclusively in the interest of nature conservation.

A 1. Various forms of constructions and installations – single buildings, various recreational facilities, commercial centres, marinas, etc – are not allowed.

A 2. Intense, highly mechanized, large-scale forestry – including the use of mechanized land preparation, fertilization, use of pesticides, etc – is not allowed.

A 3. Intense, highly mechanized, large-scale agriculture – including the use of mechanized land preparation, fertilization, use of pesticides, etc – is not allowed.

A 4. Extraction of natural resources – oil, peat, sand, clay, gravel, etc. – is not allowed.

B. Moderate protection

By moderate protection in this context is meant that nature protection is an important interest, which places limitations on the overall land use. There could, however, also be multiple land use satisfying other interests.

B 1. Some infrastructure developments could be allowed but are kept under strict control by the authorities. A special permit from the authorities must be granted for each such construction. For instance, minor roads may be built in the area, power or telephone cables may be extended through the area.

C. Wildlife protection

C 1. All access to the area, including landing, is prohibited during breeding seasons or other periods particularly sensitive in the lifecycles of seals, birds or other animals in coastal or marine areas. During those periods, access is prohibited for all visitors. However, access is allowed during the rest of the year.

IUCN Management Categories and Criteria for Protected Areas

I Strict Nature Reserve. Wilderness Area

Protected area managed mainly for science or wilderness protection.

II National Park

Protected area managed mainly for ecosystem protection and recreation.

III Natural Monument

Protected area managed mainly for conservation of specific natural features.

IV Habitat / Species Management Area

Protected area managed mainly for conservation through management intervention.

V Protected Landscape. Protected Seascape

Protected area managed mainly for landscape or seascape conservation and recreation.

VI Managed Resource Protected Area

Protected area managed mainly for the sustainable use of natural ecosystems.

No. on map	Name of area	IUCN management category	Total area (ha)	Sea area (ha)	Protection against	Additional information
35	Skælskør		550	534		– Near-city reserve. – See Area Table 2, area 79.
36	Basnas Nor		1,105	982		– Resting area for migratory birds and breeding area for waterfowl. – Included in Ramsar site 79 (Area Table 2).
37	Gavnø		925	805		Resting area for migratory birds.
38	Ulvshale-Nyord		10,000	9,770		– Breeding area for waterfowl. – See Area Table 2, areas 77, 101.
39	Vigsø		54	40		– Breeding area for waterfowl. – Vigsø and Fladet included in Ramsar site 76 (Area Table 2).
40	Majbølle		962	924		Resting area for migratory birds.
41	Fladet		74	22		– Resting area for migratory birds. – Included in Ramsar site 76 (Area Table 2).
42	Guldborgsund		321	315		– Near-city reserve. – See Area Table 2, areas 73, 97.
43	Nysted Nor		147	80		Near-city reserve.
44	Rødsand		600	600		– Seal reserve. – See area 45, and Area Table 2, areas 73, 94.
45	Hyllekrog		17,500	17,400		– Resting area for migratory birds and breeding area for waterfowl. – See area 44, and Area Table 2, areas 73, 94.
46	Nakskov and Inderfjord		188	93		– Resting area for migratory birds.
47	Sydfynske Øhav		99	43		– Breeding area for waterfowl. – See Area Table 2, areas 80, 116.
48	Svendborg		660	660		Near-city reserve.
49	Arreskov Sø		312			Resting area for migratory birds.
50	Odense Fjord		6,300	6,000		– Resting area for migratory birds. – See Area Table 2, area 119.

Area Table 1:4: Protected coastal and marine areas in Denmark

No. on map	Name of area	IUCN management category	Total area (ha)	Sea area (ha)	Protection against	Additional information
51	Mejlø		58	25		Breeding area for waterfowl.
52	Fredericia		1.280	1.211		Near-city reserve.
53	Gamborg Inddæmning		87	2		– Resting area for migratory birds. – Included in Ramsar site 81 (Area Table 2).
54	Augustenborg		62	26		Near-city reserve.
55	Kalvø		135	100		Resting area for migratory birds.
56	Årø Kalv		60	30		– Breeding area for waterfowl. – Included in Ramsar site 8 1 (Area Table 2).
57	Hejlsminde Nor		288	201		Resting area for migratory birds.
58	Kolding Inderfjord		228	224		Near-city reserve.
59	Vejle Inderfjord		659	498		– Near-city reserve. – See Area Table 2, area 123 .
60	Horsens Nerrestrand		216	134		Near-city reserve.
61	Lerdrup Bugt		872	842		– Resting area for migratory birds. – Included in Ramsar site 85 (Area Table 2).
62	Møllegunden and Svanegrunden		234	221		Seal reserve and breeding area for waterfowl.
63	Stavns Fjord		1,800	1,564		– Resting area for migratory birds. – See areas 7, 23 , and Area Table 2, areas 84, 125, 143.
64	Bosserne/Lindholm		139	117		Seal reserve and breeding area for waterfowl.
65	Norsminde Fjord		334	183		Resting area for migratory birds.
66	Ebeltoft Vig		391	324		Near-city reserve.
67	Hobro		292	201		Near-city reserve.
68	Mariager Fjord		2,200	2,135		– Resting area for migratory birds and breeding area for waterfowl. – See Area Table 2, areas 87, 127.
69	Bovet-Knotten		3,000	2,950		Resting area for migratory birds.
70	Nibe-Gjøl Bredning		9,500	9,500		Resting area for migratory birds.
71	Ulvedybet		822	605		Resting area for migratory birds.

RAMSAR SITES					
72	Ertholmene east of Bornholm		1,479	1,213	– Identical with EC Bird Directive Area 92. – See Area Table 1, area 1.
73	Waters between Lolland and Falster, including Rødsand, Guldborgsund and Bøtø Nor		37,210	31,480	Included in EC Bird Directive Areas 93 (Bøtø Nor) and 94 (Coast near Hyllekrog– Rødsand).
74	Nakskov Fjord and Inderfjord		8,552	7,758	Identical with EC Bird Directive Area 96.
75	Maribosseme (Maribo Lakes)		3,810		Identical with EC Bird Directive Area 95.
76	The waters south-east of Fejø and Femø Islands		41,680	38,290	Included in EC Bird Directive Area 98 (Smålandshavet north of Lolland).
77	Præstø Fjord, Jungshoved Nor, Ulvshale and Nyord		24,640	21,160	Identical with EC Bird Directive Area 101.
78	Karrebsk Fjord, Dybsø Fjord and Avns Fjord		18,860	14,380	Identical with EC Bird Directive Area 102.
79	The waters south of Zealand, Skælskø Fjord, and Glænø and adjacent wetlands		18,429	13,915	Included in EC Bird Directive Area 104 (Skælskør Nor, Skælslø Fjord and Gammelso) and 103.
80	Sydfynske Ohav		38,440	32,780	– Archipelago area. – Identical with EC Bird Directive Area 116.
81	Lillebælt		35,058	28,322	Identical with EC Bird Directive Area 122.
82	Nærå Strand and Æbelø area		13,060	9,771	Identical with EC Bird Directive Area 120.
83	Sejerø Bug-t, Nekselø Bug-t, Saltbæk Vig		43,877	38,900	Included in EC Bird Directive Areas 109, 112.
84	Stavns Fjord with adjacent waters		15,450	14,870	Identical with EC Bird Directive Area 125
85	Horsens Fjord and Endelave		42,580	39,340	Identical with EC Bird Directive Area 124.
86	Waters north of Anholt		11,520	11,450	Identical with EC Bird Directive Area 134.
87	Parts of Randers and Mariager Fjords and the adjacent sea		39,040	33,410	Included in EC Bird Directive Area 127.

Protected coastal and marine areas in Estonia

No. on map	Name of area	IUCN management category	Total area (ha)	Sea area (ha)	Additional information
RAMSAR SITES					
31	Matsalu Nature Reserve	–	48,640	26,273	– See Area Table 3, area 8. – Designated as a Baltic Sea Protected Area (area 33).
BALTIC SEA PROTECTED AREAS					
32	Lahemaa National Park	II	112,011	47,096	– See Area Table 3, area 1. – Coastline: 145 km.
33	Matsalu Nature Reserve	IV, I	48,640	26,273	– See area 30 and Area Table 3, area 8. – Coastline: 125 km.
34	Vilsandi National Park	II	18,155	10,500	– See Area Table 3, area 3. – Included in the West-Estonian Archipelago Biosphere Reserve (area 35). – Coastline, including all islands: 140 km.
BIOSPHERE RESERVES					
35	West-Estonian Archipelago Biosphere Reserve		1,560,078	1,156,300	-- Includes Vilsandi national park (Area Table 3, area 3); nature reserves Abruksa and Viidumäe (areas 4, 14); landscape reserves Islets near Hiiumaa, Käina, Linnulaht, and Tagamdisa (areas 17, 19, 20, 27); – Protection against A in reserve areas.

Area Table 5: PLANS AND PROPOSALS

Coastal and marine areas for which protection is planned or proposed in Estonia

Name of area	IUCN management category	Total area (ha)	Sea area (ha)	Protection against	Additional information
PROPOSED AS RAMSAR SITES					
Haapsalu-Noarootsi Bays	–	10,600	?		Complex of shallow, eutrophic bogs and relict lakes.
Käina Bay	V	1,280	–		– Eutrophic brackish lagoon with reedbeds and small low islets. – See Area Table 3, area 19.
Islets near Hiiumaa	V	6,500	?		– Shallow-water shelf sea with small islets and bays. Coastal meadows and salt marshes. – See Area Table 3, area 17.
Väike vain	–	≈ 25,000	?		– Coastal and marine area including Väike vain (strait) between the islands of Saaremaa and Muhu, and the islet of Kdinastu, north-east of Saaremaa. – Meadows, reedbeds, mud flats, islands.
Puhtu-Laelatu-Nehatu	IV	4,019	≈ 1,500		– Shallow inland bays (lagoons), alvars, wooded meadows, mires. – See Area Table 3, areas 11, 15.
Soomaa wetland complex	II	37,169			– Large bog complex. – See Area Table 3, area 2.
Nigula bog	IV, I	4,921			– Mire complex. – See Area Table 3, area 10.
Muraka mire complex	IV, I	12,274			– Large bog complex. – See Area Table 3, area 9.
POTENTIAL RAMSAR SITES					
Kootsaare- Mudaste coastal meadows	–	?	?		Coastal wetland area on western Hiiumaa.
Hari Kurk vain		?	?		Marine area in the strait between the islands of Hiiumaa and Vormsi.
Läänemaa Suursoo mire complex	V	9,714			See Area Table 3, area 22.

Area Table 5:2: Coastal and marine areas for which protection is planned or proposed in Estonia.

Name of area	IUCN management category	Total area (ha)	Sea area (ha)	Protection against	Additional information
Vilsandi archipelago	II	18,155	10,500		See Area Table 3, area 3.
Rahuste coastal meadows and Lõu Bay	–	?	?		Coastal area on the peninsula at the Lõu Bay on southern Saaremaa.
Suurlaht – Linnulaht– Mullutu		?	?		– Lake area on southern Saaremaa. – See also Area Table 3, area 20.
Siiksaare wetland complex		?	?		Coastal area on south-eastern Saaremaa.
Avaste fen	IV	4,188			See Area Table 3, area 5.
Nätsi–Võlla bog	IV	9,772	–		See Area Table 3, area 12 .
Tdstamaa coastal meadows		?	?		
Kihnu vain		?	?		Coastal and marine area in the strait between the island of Kihnu and the mainland.
Häädemeeste coastal meadows	–	?	?		Coastal meadows, dunes, mires.
Sirtsu bog	IV	2,853			See Area Table 3, area 13 .
Agusalu mire complex	V	7,657	–		See Area Table 3, area 16 .
Struuga floodplain meadow		?			
PLANNED BALTIC SEA PROTECTED AREAS					
Islets near Hiiumaa		32,300	26,000		– Coastal archipelago and wetland area that will include the landscape reserves of Hiiumaa Islets and Käina Bay (Area Table 3, areas 17, 19). – Coastline: 160 km.
Kõpu Peninsula		79,000	70,000		– Marine and coastal area on the island of Hiiumaa in the West-Estonian Archipelago Biosphere Reserve (area 35). – Coastline: 60 km.

No. on map	Name of area	IUCN management category	Total area (ha)	Sea area (ha)	Protection against	Additional information
15	Bernāti	IV	402		A2	– Botanical reserve, – Old-growth dune forest.
16	Oviši	IV	1,792	–	A2	– Botanical reserve. – Coastal area; outstretched narrow, pine covered dune ridges.
17	Skarbes	IV	185		A4	Bog reserve.
18	Pluču	IV	477	–	A4	Bog reserve.
19	Klāņu	IV	959	–	A1	Bog reserve.
20	Sārnates	IV	1,413		A4	Bog reserve.
21	Stiklu (Stikli) bogs	IV	2,388	–	A2, A4	– Bog reserve. – High, transitional bog complex. – Expansion proposed (Area Table 14)
22	Lielais Ķemeru tirelis	IV	5,762	–	A4	Bog reserve.
23	Vitini	IV	199	–	A3	Bog reserve.
24	Nagļu and Ansiņu	IV	274	–	A4	Cranberry reserve.
25	Tīša	IV	55	–	A4	– Cranberry reserve. – Bog around Lake Tīša .
26	Drabiņu	IV	76	–	A4	Cranberry reserve.
27	Lāču	IV	147	–	A4	Cranberry reserve.
28	Dunika tirelis	IV	1,334	–	A4	Cranberry reserve.
29	Zemgaļu	IV	248	–	A4	Cranberry reserve.
30	Bērzu	IV	120	–	A4	Cranberry reserve.
31	Riesta – Džūkstenes	IV	280	–	A4	Cranberry reserve.
32	Lake Liepāja	IV	3,715		C, A1	– Zoological reserve. – Coastal lagoon-type lake.
33	Lake Pape	IV	1,205	–	C, A1	– Zoological reserve. – Coastal lagoon-type lake

Area Table 1 2A:3: Protected coastal and marine areas in Latvia.

No. on map	Name of area	IUCN management category	Total area (ha)	Sea area (ha)	Protection against	Additional information
34	Lake Babite	IV	2,555		C, A1	<ul style="list-style-type: none"> - Zoological reserve. - Coastal lagoon-type lake - Proposed as a Ramsar site.
35	Lake Engure	IV	4,278		C, A1	<ul style="list-style-type: none"> - Zoological reserve. - Coastal lake with islands and floodplain meadows. - Proposal for an expansion of the area to 18,000 ha. See also Area Table 14. - Designated as a Ramsar site (Area Table 13, area 49).
36	Lake Kapiervis	IV	1,128		C, A1	<ul style="list-style-type: none"> - Zoological reserve. - Coastal lagoon-type lake. - Designated as a Ramsar site (Area Table 13, area 50).
37	Seaboard at Mērsrags	IV	51	-	A3	<ul style="list-style-type: none"> - Zoological reserve - Complex of coastal biotopes, meadows and dunes. - See also Coastal section from Kaltene to Engure, a designated Baltic Sea Protected Area (Area Table 13, area 52).

LANDSCAPE RESERVES (COMPLEX NATURE RESERVES)

38	North Vidzeme Regional Nature Protection Complex	V	400,000			<ul style="list-style-type: none"> About half of North Vidzeme Regional Nature Protection Complex is located within 50 km from the coastline. - The Complex includes several nature reserves; see Area Table 12 B and Map 13 B. - North Vidzeme Regional Nature Protection Complex is proposed as a Biosphere Reserve. - See also Area Table 13, area 5 1.
39	Venta	V	1,638	-	B1	Valleys of Rivers Venta and Skervelis.
40	Medze	V	70	-	A3	Coastal area with dunes.
41	Vecdaugava	V	236	-	A1	Oxbow of River Daugava, with floodplain meadows.
42	Kalkupe	V	575		A2	Valley of River Kalkupe.
43	Rakupe	V	616	-	A3	Valley of River Rakupe.
44	Slocene	V	1,612	-	A2	Valley of River Slocene.

Protected coastal and marine areas in Latvia

No. on map	Name of area	IUCN management category	Total area (ha)	Sea area (ha)	Additional information
RAMSAR SITES					
49	Lake Engure		18,000	–	– See also nature reserves (Area Table 12A, area 35). – See also Area Table 14.
50	Lake Kaņieris		1,200	–	See also nature reserves (Area Table 12 A, area 36).
BALTIC SEA PROTECTED AREAS					
51	Coastal section from Dzeņi to Ainaži		18,000	18,000	– Off the North Vidzeme Regional Nature Protection Complex (Area Table 12 A, area 38, and Area Table 12 B). Comprises the coastal section from Ainaži, on the Estonian border, to Dzeņi at the mouth of River Svētupe. – Coastline: 27.5 km. – See also Area Table 12 B, area NV 13.
52	Coastal section from Kaltene to Engure		24,000	12,000	– Comprises the coastal section from Kaltene to south of Lake Engure. – See also nature reserves (Area Table 12A, area 37).
53	Coastal section from Lielirbe to Kolka	I	15,000	11,500	– Comprises a terrestrial area included in Slitere Strict Nature Reserve (Area Table 12 A, area 2) and marine area off the coast. – Coastline: 34 km.
54	Coastal section from Pape to Perkone		68,000	68,000	– Comprises the coastal section from south of Lake Pape to Perkone, west of Lake Liepāja. – Coastline: 30 km.

Area Table 14: PLANS AND PROPOSALS

Coastal and marine areas for which protection is planned or proposed in Latvia

Name of area	IUCN management category	Total area (ha)	Sea area (ha)	Protection against	Additional information
Lake Engure	–	18,000	–		Expansion proposed of nature reserve/Ramsar site.
Lake Kadaga		101		–	– Lagoon-type lake, north-east of Rīga. – Protection proposed.
Lake Ummas		84	–	–	– Lake north-east of Rīga. – Protection proposed.
Lake Lieluikas		190			– Lagoon-type lake, north-east of Rīga. – Protection proposed.
Lake Mazuikas			–	–	– Lagoon-type lake, north-east of Rīga. – Protection proposed.
Stiklu (Stikli) bogs	IV	10,900	–	A2, A4	– Bog reserve (Area Table 12 A, area 2 1). – High, transitional bog complex. – Expansion proposed of present nature reserve.
Nidas wetland		1,979			– Wetland area on the border to Lithuania. – Protection proposed.
Ķirbas wetland		1,226			– Wetland area, north-east of Nidas. – Protection proposed.
Ziemupe	IV	–	–	A2	– Botanical reserve (Area Table 12 A, area 10). – Vast sandbank stretching offshore. Dunes. – Coastal wetland area. – Expansion of present nature reserve (1,835 ha) proposed.
Vakarbuli		58	–	–	– Coastal meadows, north of Rīga. – Protection proposed.
Jaunciems	–		–	–	– Bog area, east of Rīga. – Protection proposed.
Bernāti	IV	657	–	A2	– Botanical reserve (Area Table 1 2A, area 15). – Old-growth dune forest. – Expansion (nature park) of present nature reserve (402 ha) planned.

Area Table 14.2: Coastal and marine areas for which protection is planned or proposed in Latvia.

Name of area	IUCN management category	Total area (ha)	Sea area (ha)	Protection against	Additional information
Sārņates	IV	–	–	A4	– Bog reserve (Area Table 12 A, area 20). – Expansion (nature park) of present nature reserve (1,4 13 ha) planned.
Lielais Ķemeru tirelis	IV	40,690	–	A4	– Bog reserve (Area Table 12 A, area 22). – Expansion (nature park) of present nature reserve (5,762 ha) planned.
Daugagrīva	IV	158	–	B1	Meadows and wetlands, north of Rīga.
Lielais and Pemmas bog	IV	3,067	–	A4	Wetland areas, south of Vidzeme.
Laugas wetland	IV	1,467	–	A4	Wetland area, south of Vidzeme.
Cēnas tirelis	IV	2,378	–	A4	Wetland area, south of Lake Babīte.
Užava	V	307	–	A3	– Coastal meadows, south of Ventspils. – Botanical reserve (Area Table 1 2A, area 14). – Expansion of present nature reserve (303 ha) proposed.
Lake Tosmāre	IV	375	–	B1	Lagoon-type lake, north of Lake Liepāja.
Vītiņu meadows	IV	201	–	A3	Coastal meadows, by Lake Liepāja.
Oviši	V	6,317	–	B1	– Botanical reserve (Area Table 12A, area 16). – Coastal area, between Ventspils and Slītere. – Expansion of present nature reserve (1,792 ha) proposed.
Lake Garezers	IV	197	–	A4	Lagoon-type lake, north-east of Rīga.
