... [The Scientific Committee on Problems of the Environment \(SCOPE\) of the International Council for Science \(ICSU\) established the International SCOPE Biofuels Project to provide a comprehensive and objective, science-based analysis of the effects of biofuels on the environment. The SCOPE Biofuels Project held an international workshop in Gummersbach, Germany, organized by Bob Howarth \(Cornell University, USA\) and Stefan Brinzeu \(Wuppertal Institute, Germany\) from September 22-24, 2008 to develop a "rapid assessment" of these environmental consequences. Scientists from 21 countries representing a diversity of disciplines participated in the assessment. The executive summary is now available online at <http://cip.cornell.edu/biofuels/>. The workshop report is also covered in an article in the March 20, 2009 Scientific American: SCOPE Biofuels is a LOICZ-affiliated project. This excerpt from the executive summary outlines some of the major environmental issues discussed in the report.
