

Finance Working Group - PCCR

Main Recommendations:

1. Supporting national coordination of climate change funding/resources:
 - Conduct an analysis on national donor coordinating mechanisms (capacity needs, experiences and lessons learnt), as well as existing donor support programmes aiming at strengthening governance for aid coordination
 - Provide assistance to support building capacity for in-country donor coordination where requested
 - Support the extension of NAPA processes to all PICS as necessary (in line with the AOSIS submission to UNFCCC)

2. Supporting regional coordination of climate change funding/resources
 - Conduct a study assessing existing regional funding mechanisms, and explore the feasibility of establishing a Pacific Adaptation Fund/Facility, based on a ToR to be developed.
 - Assess the need/feasibility for a regional technical support/backstopping function/mechanism (linked with the possible Adaptation Fund/Facility and the planned CC Portal functions)
